

Shading system consisting of 4 columns in square tubular steel 100x100x3 mm and a 15 mm thick steel sheet base plate. The shading cover is made up of four modules with 9 rectangular steel tubes 80x10x1.5 mm arranged in parallel series. The modules are fixed to two longitudinal uprights joining the columns, made of rectangular tubing of the same cross-section as the columns.
Upon request, a set of eight Ø 6 mm stainless steel cables arranged between the columns to allow climbing plants to grow, and two rectangular planters made of 1.5 mm thick steel sheet are available on request. At the base a stainless steel overflow screwed to the bottom ensures a water reserve for vegetation.
All metal parts are galvanised and coated with thermosetting polyester powder.
All fixings are in AISI304 stainless steel.
The self-supporting platform is equipped with M12 feet adjustable from above with a 6 mm hexagonal insert socket.
